

ESTABLISHING A FOUNDATION

Gather the following data

Total area of property	
Total area of vineyard	
Total area of natural ecosystems	
Grape varieties and acreage of each	
Yield records for last 3 years	
Yield estimates for the upcoming year	

Identify following amounts of inputs per short ton of grapes produced last harvest
(break out into plots if helpful, otherwise total amounts will suffice)

Organic fertilizer	
Synthetic fertilizer	
Water	
Energy (gas/electric)	
Fuel	
Vineyard labour hours	
Other inputs?
